# BURSARIES UP FOR GRABS!

Learners can now apply for a Noupoort Wind Farm bursary.

Noupoort learners who are in matric or already enrolled full-time at a university or college can apply. Study fields are not restricted, however, professions that uplift the community are encouraged.

The bursary covers tuition fees for the duration of the studies. In addition to this, a needs assessment is conducted to establish requirement for books, accommodation and other costs.

Why not follow in the footsteps of your predecessors who are fulfilling their dreams at universities around the country!

Ngcwelekazi Yonela Sicina is one of the five 2018 bursary recipients, who is currently studying towards a Bachelor of Social Work at the University of Fort Hare.

"I can now further my studies and my dream of becoming a Social Worker without worrying about financial problems and debt in the near future".

# MATHS & SCIENCE CAN BE FUN!

Learners at Enoch Mthetho High School in Noupoort have been benefiting from the state-of-the-art Maths and Science laboratory that was funded by Noupoort Wind Farm in 2017.

With the ongoing support from the wind farm the school encourages its learners to take up Physical Science as a subject,

"The Maths and Science laboratory enhances learning and deeper understanding for the learners, which is always key with a subject such as Physical Science," explained Mr. Chiware Farai, Physics teacher, Enoch Mthetho High School.

**Siphesihle Sporo**, Grade 11: "I'm taking maths and science as school subjects because I've chosen my career path. I plan on being a doctor one day!"

**Sinovuyo Andrias** Grade 10: "The reason I love maths and science is that it helps me to understand life itself and all the scientific things in it. I always loved solving problems using my maths skills (analytical and logical). I am on a quest to explore science further and discover inventions that we can use in our daily lives. That is why maths and science are so easy - it's like eating soft porridge - lovable and enjoyable."
