COMMUNITY HEALTH SUPPORT

Noupoort Wind Farm has extended its support to local health facilities, a EurekaVille Clinic and Nanqo Simon Zono Clinic.

Water tanks and solar water geysers have been installed, in addition to other support.

The water tanks provide water during the daily water rationing measures, implemented by the Umsobombvu Municipality, due to a water shortage in the area.

Funding for essential COVID-19 medical equipment has also been provided.

This includes External Defibrillators and CPAP (continuous positive air pressure) machines, which have shown positive results, helping to reduce lung damage and allowing the patient to recover from the inflammatory effects.

"These measures will help our local healthcare facilities provide the necessary care to community members during C-19 and beyond."

FUNDING FOR INAN INKOSI OLD AGE HOME

Noupoort community change activist, Belinda Maliti, received funding and support to make a difference in the lives of the most vulnerable community members, who are beneficiaries or residents of the Inan Inkosi Old Age Home.

Inan Inkosi Old Age Home aims to ensure that the local elderly residents and people living with HIV are kept safe and provided with nutritious meals.

COMMUNITY BUSINESS FUNDING!

Funding for local SMME's, non-profit companies and a non-profit organisation has been provided, following a series of workshops that mobilised the community, intent on driving positive change within the community.

"One of the beneficiaries, Michelle Van Wyngaard: "My hope is for the youth to be well trained, focussed and willing to stand on their own, as well as encouraging them to become entrepreneurs for themselves."
